

## Web Design

### Website Design and Development

At Blue Spike Designs, we offer custom, semi-custom, and template based web design and web hosting. From simple one page web sites, to turnkey custom multiple page websites with content management, we want to help you develop an online web presence for your business or personal use. We also offer design services for logo development for your personal or corporate image needs. For more information, please feel free to contact us.

### Logo Design and Corporate Identity

We also design logos for you personal, small business, or corporate needs. Whether you need a logo for your website, business cards or graphics for a total customized business identity, we will work with you to develop designs which you can be proud to own.

### Customization of Rocket Theme and Other Joomla Templates
